

# Commercial & Residential Large Loss Restoration

## Water Damage

There is no telling when disaster will strike, and a delay in response time can cost thousands of dollars and create irreversible damage to a home or business, especially when water is involved.

Wolgast Restoration's 24/7 Emergency Response Team acts quickly to recover contents and critical equipment, saving thousands of dollars in restoration and replacement costs. Our IICRC Certified Technicians use state-of-the-art moisture detection, drying and cleaning techniques to renew and revitalize property and belongings that have been exposed to water and are in danger of subsequent microbial growth damage.

## Fire & Smoke Damage

Restoring a structure and its contents after being damaged by fire and smoke, requires more expertise than ordinary restoration companies can provide.

With over 65 years of experience in Design/Build, General Contracting, Construction Management, and Consulting, we have the capability to coordinate, facilitate, and schedule any large loss restoration and reconstruction project.

Our expert fire restoration technicians employ the latest technologies to remove smoke, soot, and odor, restoring contents and surfaces to their pre-loss condition.

## Wind & Storm Damage

Violent winds, thunderstorms, and heavy snowfall can strike in an instant, leaving a home or business in need of immediate attention.

Wolgast Restoration's Emergency Response Team can arrive to secure and stabilize damaged property just as quickly as the storm ravaged it.

We provide structural board-up and shoring to secure the structure, as well as roof tarp-off and repairs to prevent further damage. Our Senior Project Managers are HAAG certified in both commercial and residential roof inspection, ensuring you get an accurate damage assessment and cost appraisal.
